

**Amicus ITS named as a Crown  
Commercial Supplier on G-Cloud 11**

# Crown Commercial Service *Supplier*

**2<sup>nd</sup> July 2019**

For the third time in succession, Amicus ITS has been appointed as a supplier for the Crown Commercial Service (CCS) for the UK Government's 'G-Cloud' framework on the Digital Marketplace, which goes live today.

The G-Cloud procurement framework is run by the Government's Crown Commercial Service to offer a centralised, transparent portal to sell cloud services to the public sector. Amicus ITS is offering a total of 12 cloud technology services in 2019, of which 11 are around cloud support.

For public sector and healthcare organisations across England and Wales, this pre-compliant window enables organisations to independently scrutinise and compare providers like-for-like against their respective technology needs. This includes details of how the services will be supported as well as disclosure on pricing and how this is measured. For buyers it creates an auditable shortlist of suppliers, with clear visibility internally to their Boards - and externally, to the taxpayer. For IT Managed Service Providers like Amicus ITS, it allows us to demonstrate how we will support and maintain a service either as a standalone, or as part of a wider bundle of managed technology services.

Amicus ITS' G-Cloud 11 services for 2019 are shown [here](#) and include the following:

- Service Desk as a Service
- Network Operations Centre - NOC
- Managed SQL Services
- Managed SQL Services for NHS
- Cloud Readiness Assessment Consultancy
- Public Sector Modern Workplace - Microsoft 365
- Cloud migration to Azure
- Security Operations Centre – SOC Design
- Virtual CISO
- Password Compliance & Authentication Service
- Data Classification Information Security & Compliance
- Disaster Recovery as a Service - DRaaS

Sales Director Les Keen

Sales Director **Les Keen** commented: *"I am very proud we are continuing our close association with the CCS. G-Cloud represents an easy to use platform to buy from, which is fully scalable and my public sector team and I are always available to discuss any aspect of the services prior to purchase to ensure best fit. Those services that are highly specialist in our security canon are run in conjunction with some of our specialist technology partners. So, whatever you choose from G-Cloud or our wider service catalogue, our customers know their IT is in safe hands with Amicus ITS."*

All service details can be viewed from today at
